Practice in Spain

by Krzysztof Tomasik

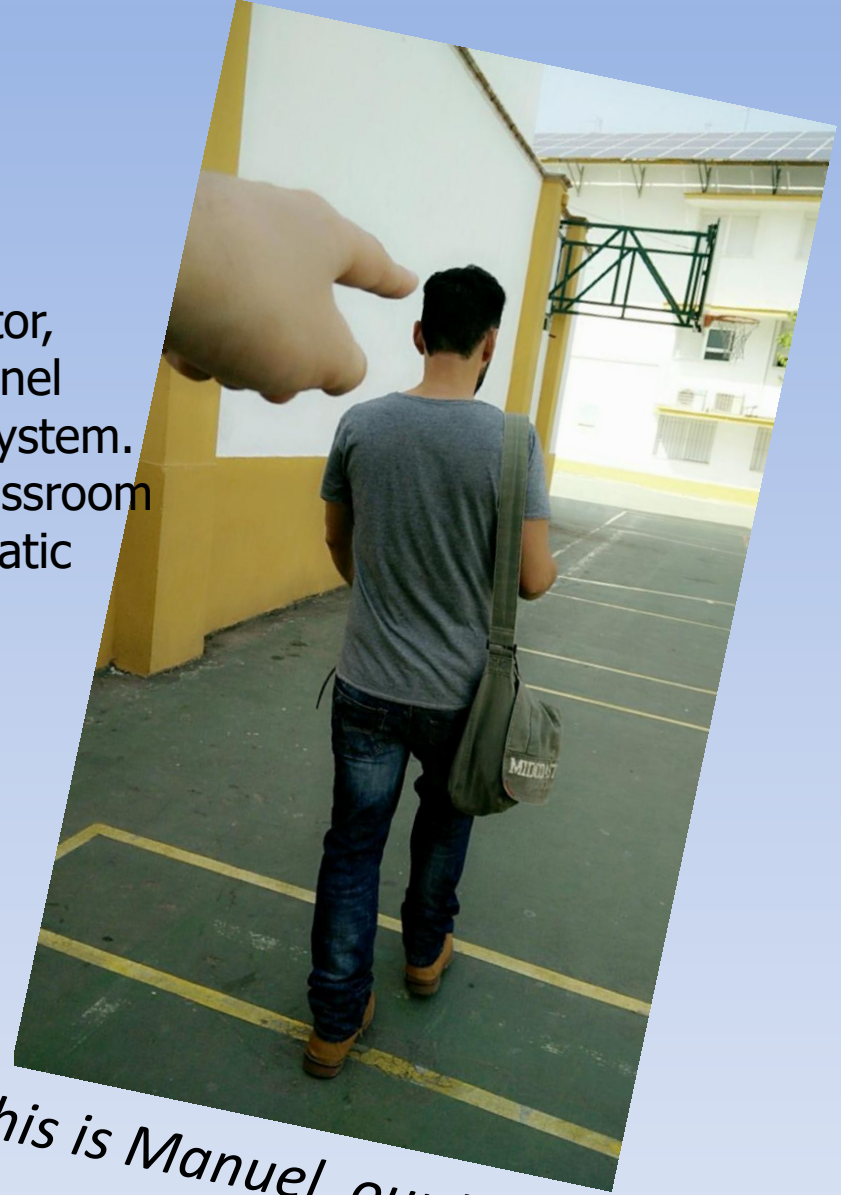

7th April - we are flying to Spain on monthly practice

In the first days we visited around. Spanish people were celebrating 'Feria de Abril'. It's a tradition in Seville. We could see how Spanish people are enjoying themselves.

We had practical lessons with Manuel. During first two weeks we had to make electrical installation with inverter, regulator, fuses etc. And we had to submit solar panel with boiler and the whole water supply system. For the next two weeks we worked in classroom on computers. We had to design 'Bioclimatic House' in the Autocad program

This is Manuel, our teacher

Ours Electrical Instalations

It's me while work, the temperature was very high

Besides the work we had trips related our work

ABENGOA

ABENGOA

Except trips and work we used to learn Spanish language

MILO BYŁO WAS POZNAĆ!!

¡Mucho gusto!

JUST
RELAX

AND

HABLA
ESPAÑOL

MARI

We had a lot of spare time. We visited the club 'Utophia'. While coffee break we could play in basketball and on the last day we spent a great time with our mentor Manuel.
